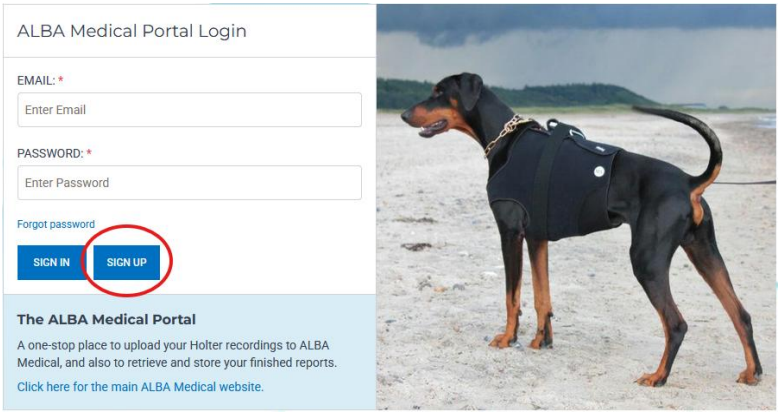
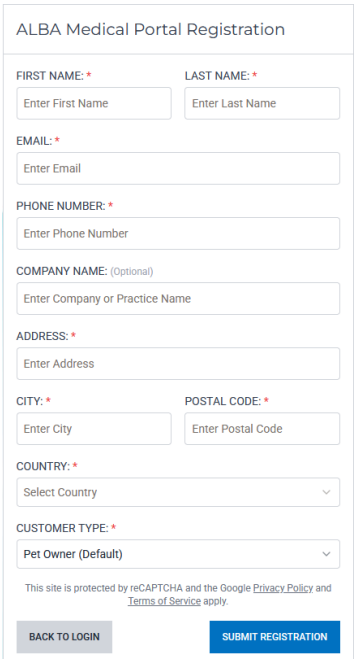
ALBA Online Holter Transmission – Mini-Portal

After the patient has worn the Holter monitor, upload the recording to the ALBA Medical "Mini-Portal". This Mini-Portal is also where you will retrieve your reports after the ALBA Staff has posted them.

You will have to "Sign Up" the first time you use the Mini-Portal. The web address to navigate to is:

www.holter.org





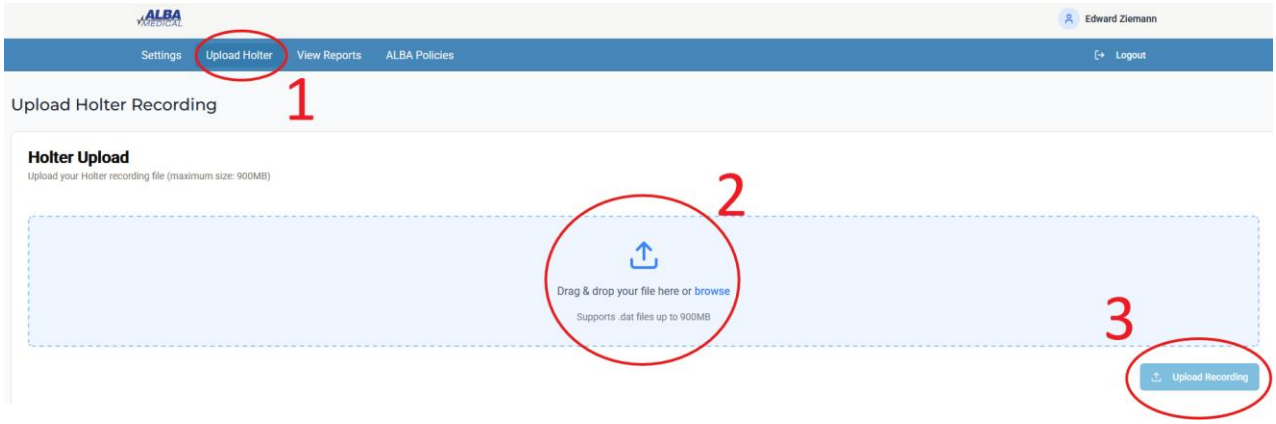
REGISTRATION

Registration is straightforward. Please enter your contact information, including your "Customer Type". This can be set as Vet Office, Dog Breeder, Pet Owner or Other.

After you submit your registration, our staff will approve your account. Please note that account approval is not automatic. Your registration will be manually reviewed by our team during normal business hours. Upon approval, you will receive your login credentials including password via email. You will be able to change the password when you log into your account for the first time.

The first time you log in, you will be shown important information about the Holter Reports as well as ALBA Medical's Service Policies. This information will be accessible on a tab called "Policies" in the future for your review.

UPLOADING A FILE



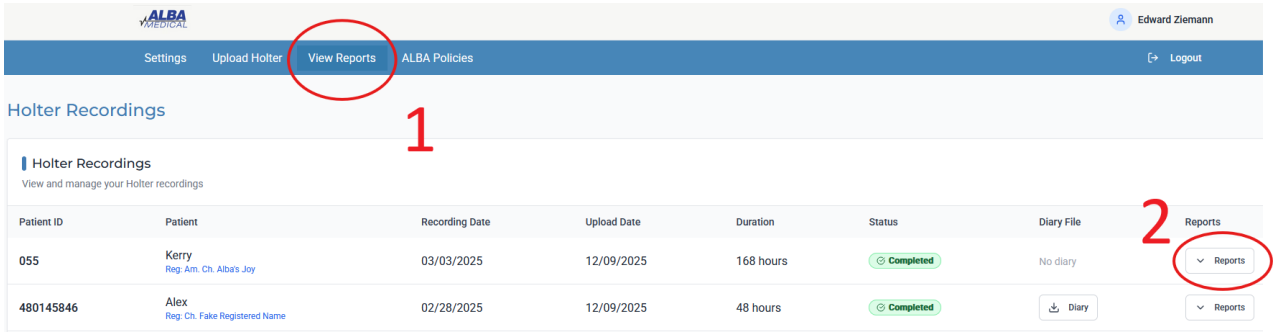
Your ALBA Digital Holter records the ECG data to a file called “flash.dat”.

For DR200 Holters: this file is located on your SD card. When you insert the SD card in a card reader, a drive letter like f: or g: will contain the flash.dat file.

For DR400 Holters: this file is located on the Holter device. When you insert the machine in the dock, a drive letter like f: or g: named NORTHEAST will contain the flash.dat file.

To upload your file to ALBA Medical, please follow steps 1, 2 & 3 above to select the flash.dat file and to upload the recording.

RETREIVING YOUR REPORTS



Use the “View Reports” tab to check on the status of your report. Right after you upload the ECG Data, the status of your report will be “Pending”. After our staff has completed your report and payment for service has been made, this status will change to “Completed” and the report can be found by Step 2.

Please call ALBA Medical Tech Support with the phone number below if you have any problems.
